CONTRACT NO. 4400004712

**RETAINER CONTRACT FOR TRAFFIC SIGNAL ENGINEERING
STATEWIDE**

QUESTIONS AND ANSWERS

Q1. For the “stand alone traffic signal projects” will there be a need for the consultant to perform topographic surveys? (Task 6.0 – Traffic Signal Plan Creation, page 3)

A1. We will not be asking for topographic surveys, but the consultant will have to create intersection diagrams that show the existing and proposed locations for signal equipment.

Q2: Can this requirement number four (4) be met by the selected consultant prior to signing the contract?

A2: Certificate or registration for the class must be presented at time of submittal. If registration is shown, class must be completed before shortlist is presented to the Secretary. Please contact Kris McCoy of Trafficware at (281) 202-9436 to schedule the required classes for Trafficware Controller Course on Naztec TS1 and TS2 controllers and Streetwise software.
